

EVIDENCE

Everett B. Ricketson, Founder

THE HARTFORD BUILDERS FINISH COMPANY began its work in the shop shown on the opposite page and has grown to the splendid manufactory illustrated below. The business was founded by the late Mr. Everett B. Ricketson who is responsible for its sound fundamentals and much of its growth. Today Mr. Gerald B. Ricketson and Mr. William E. Ricketson, sons of the founder, direct its progress.

EVIDENCE

OF PROGRESS

- - a story of a large plant

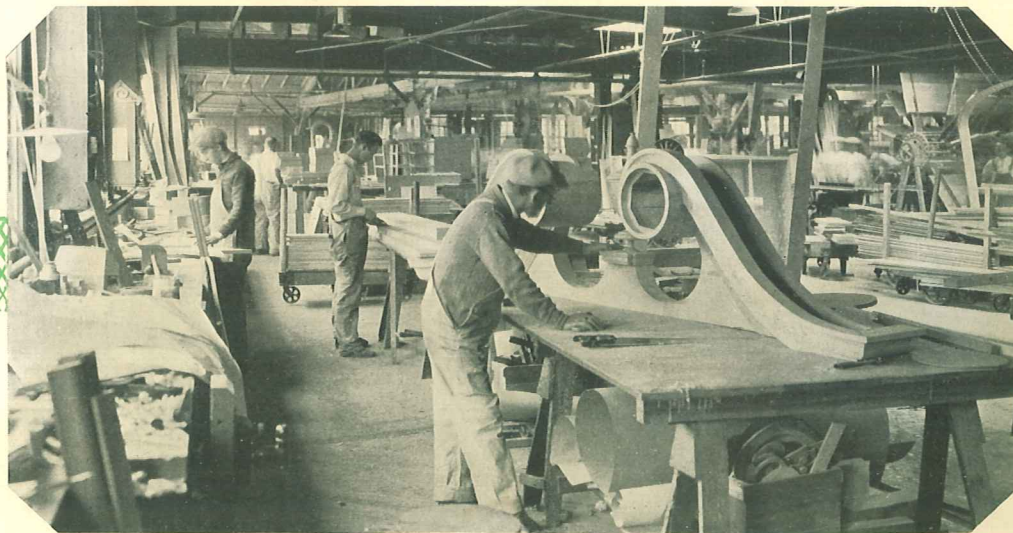

"1902"

T HAS taken twenty-eight years to evolve the present plant of the Hartford Builders Finish Company. Twenty-eight years of keeping everlastingly at it, and ten years of actual construction. The evolution has been going on for a decade. Gradual but steady replacement with modern and efficient equipment, additions of new buildings, new facilities, and modern practices have built the new plant to paramount efficiency. This means a production chain modern throughout, from a new kiln-drying plant with a capacity of well over a quarter of a million feet of lumber per month, forming the essential

process on which all good woodwork is based, to a glazing plant equipped for even the most intricate work in glass design. The entire scheme of things has been built around the realization that there is a real need for a plant designed not only to produce everything in the nature of builders' finish from an outside window frame to the most elaborately carved paneling, but to produce this material swiftly, economically, and therefore at a reasonable price.

The architect, contractor, and owner benefit from the ample store of standard trim, the plant's facilities for rapid delivery, and the will on the part of the company's officers to co-operate fully in meeting requirements, large and small.

A Corner of the Cabinet Department

HARTFORD BUILDERS

FINISH COMPANY INC.

A new storage plant designed for better service

THE architect may co-operate closely with our draughting department, which, in connection with the skill of our experienced artisans, most of whom have made woodworking a life work, makes it possible for us to produce practically anything that is made of wood.

We present evidence of achievement in creating outstanding work for outstanding institutions and individuals. Price, and that priceless ingredient of satisfactory relationship, which people call service for the want of a better name, these things are things not to be published. They are demonstrated only by the personal touch of face to face relationship. We wish to make this a cordial invitation to visit our modern electrically powered factory. Here four score persons are working together under ideal conditions, producing both standard and custom-made woodwork, on which we rely not only for satisfaction to the customer, but for the carrying on of a reputation as one of the outstanding producers of fine interior and exterior woodwork in this section of the United States.

EVIDENCE

OF ACHIEVEMENT AMONG THE
PUBLIC BUILDINGS OF CONNECTICUT

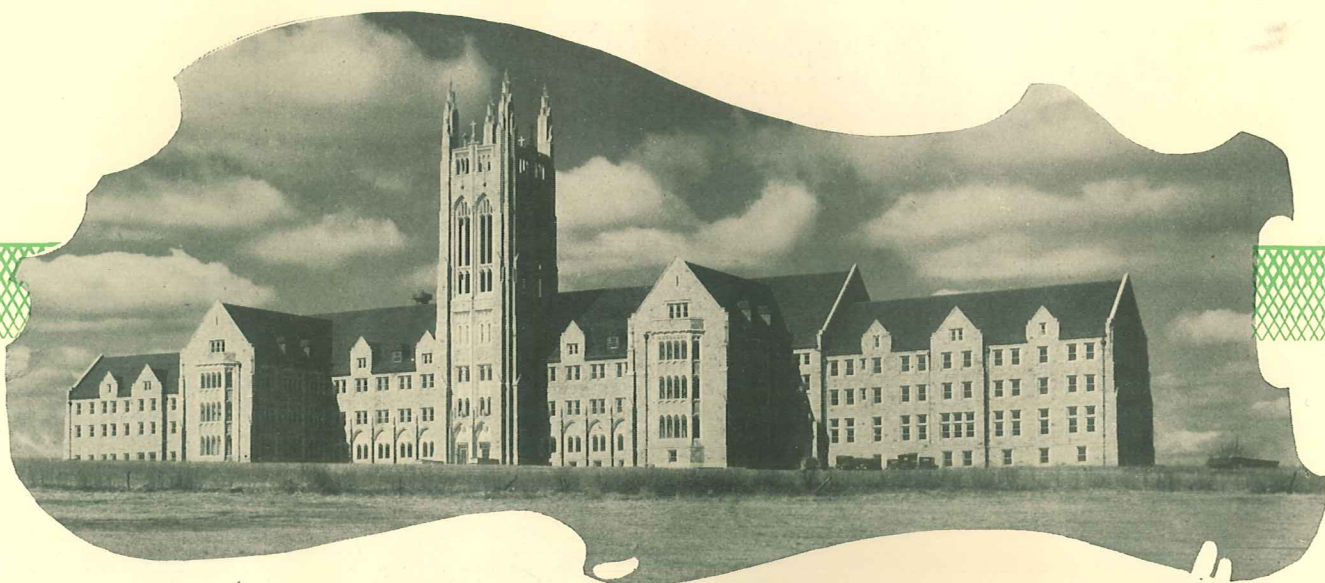

THE following are but a few examples chosen almost at random from our work for state and city government, churches, banks, schools, and other organizations of a public nature.

HARTFORD BUILDERS

FINISH COMPANY INC.

St. Thomas Seminary

Louis A. Walsh, Architect
Wm. F. O'Neil, Contractor

IN building the splendid structure which houses St. Thomas Seminary in Hartford, the Hartford Builders Finish Company was selected to maintain the high standard set in the construction of these buildings, in furnishing both rugged sash material and the finest details of ornamental interior woodwork. This organization is pardonably proud of its important part in the achievement of this magnificent group of buildings.

Hartford's fire headquarters on Pearl Street is one of the most beautiful buildings of its kind in the country. The selection of this organization to supply the interior finish was quite in keeping with the care taken to build this structure as well as it could be built.

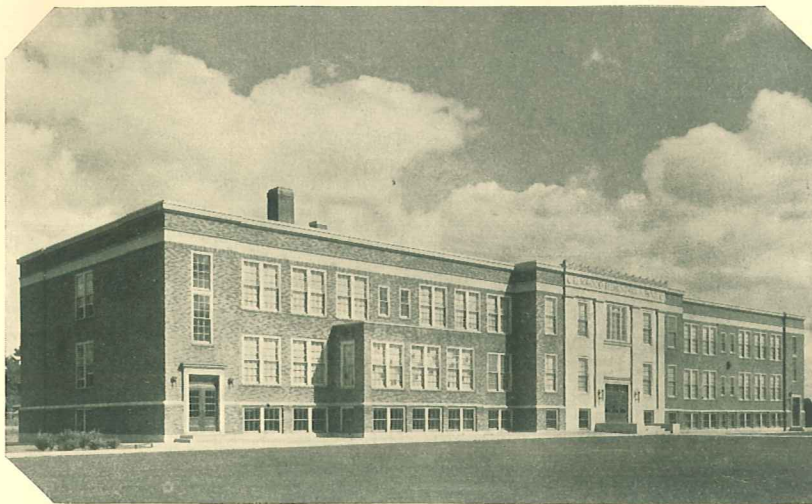

Hartford Fire Headquarters

Smith & Bassette, Architects
S. C. Porris & Co., Contractors

HARTFORD BUILDERS

FINISH COMPANY INC.

Russell F. Barker, Architect
A. F. Peaslee, Contractor

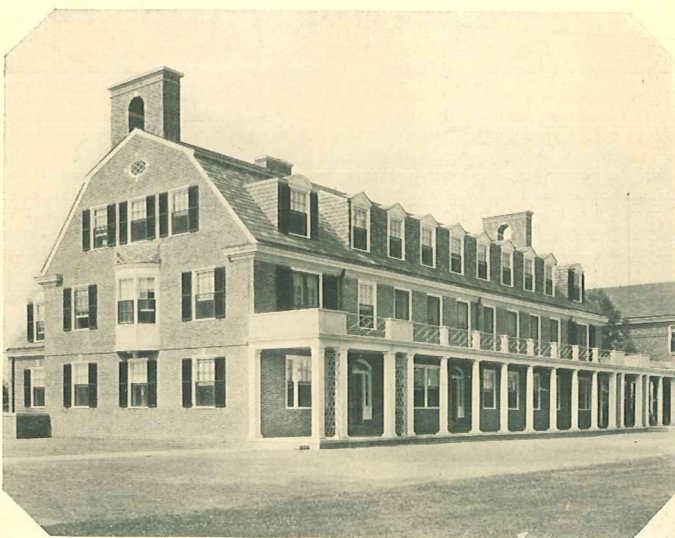

Elmwood Elementary School

William H. Hall High School

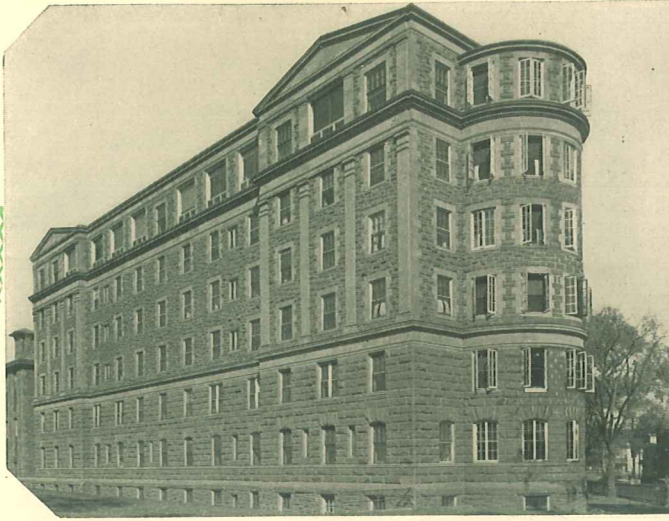

ELL executed interiors add much to the attractiveness of these two school buildings which illustrate not only the acceptance of the Hartford Builders Finish Company in the most "particular" grades of work, but also the present trend toward making our institutions of learning more than mere boards and plaster. The building at the left, above, is the Elmwood Elementary School, a fine example of the modern idea in school building construction. At the right, above, is the beautiful William H. Hall High School in West Hartford.

R. H. Dana, Jr., Architect

R. F. Jones & Co., Contractors

The illustration at the left is an addition to the well known Loomis Institute in Windsor. In private as well as public institutions, this organization is known as a manufacturer of woodwork that will meet the highest standard of specifications. This is but one of many buildings at this institute furnished by us.

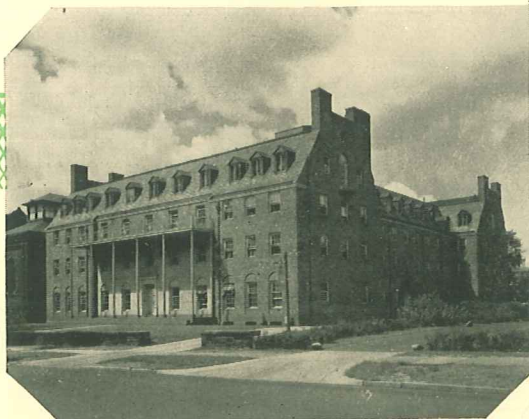

Carl J. Malmfeldt, Architect
R. F. Jones & Co., Contractors
Hartford Hospital Maternity Building

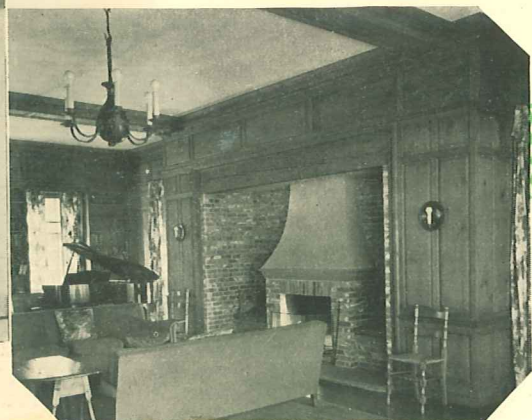

Kendall Taylor and Company, Boston, Architects
A. F. Peaslee, Contractor
Hartford Hospital, Crane Memorial Building

ALSO a leading building in its class is the Maternity Building of the Hartford Hospital, located on Retreat Avenue. Here again this organization was selected to produce an interior of distinction, following the architect's specifications to the letter. Another building of the same institution, the new Florence Crane Memorial Building on Jefferson Street, is shown at the right. It is an altogether modern building that strikes a new note both in architectural design and in congenial comfort. The interior finishes enhance the colonial motif and add materially to the pleasant atmosphere of the residence. The illustrations below are of the new Y. W. C. A. residence on Broad Street, Hartford. In this striking building, exterior and interior woodwork by the Hartford Builders Finish Company achieves possible, and is an example for similar structures everywhere. » » »

Smith & Bassette, Architects

HARTFORD BUILDERS

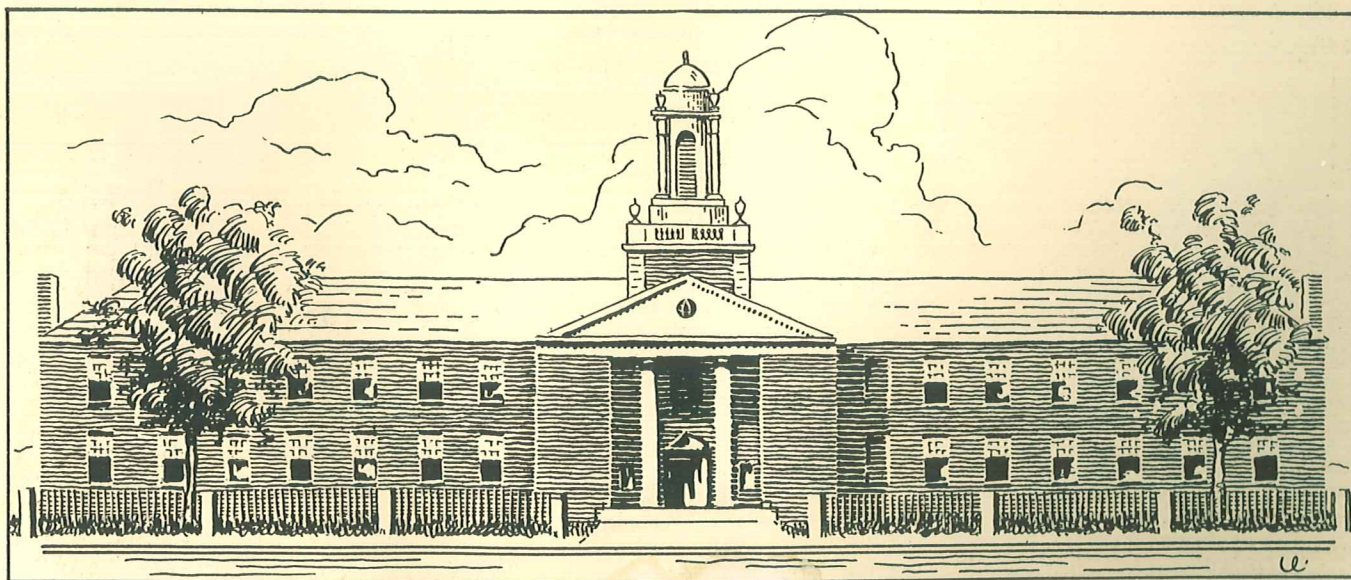

FINISH COMPANY INC.

Whiton & McMahon, Architects Wm. F. O'Neil, Contractor

THESE two public school buildings show the value of well executed interior finish. Above is the Richard J. Kinsella School, Charter Oak Avenue, one of the largest of the Hartford public elementary schools. Below is an architect's drawing of the new West Middle School on Asylum Avenue, Hartford, one of the most modern and beautiful structures of its kind in the East. Here again this organization has been intrusted with the proper fulfillment of all exterior and interior finish material requirements.

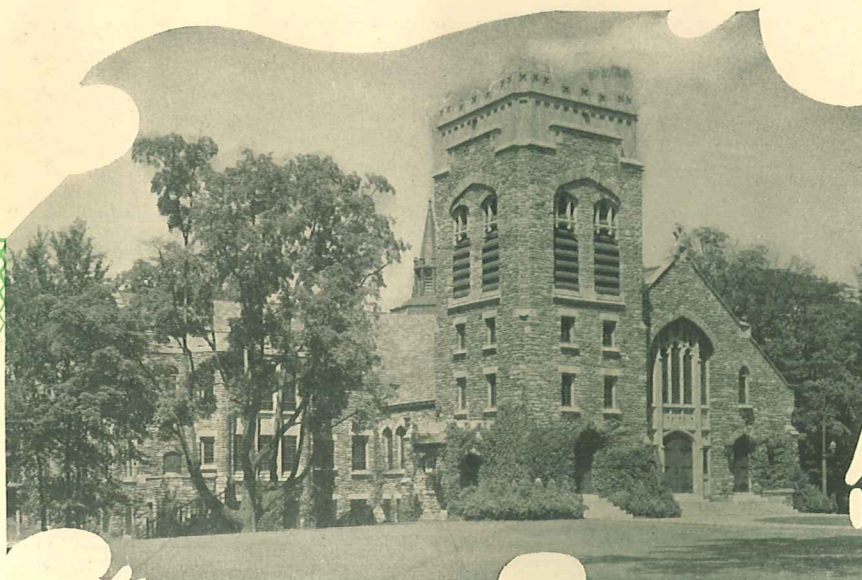

Malmfelt-Adams & Prentice, Architects F. Peaslee, Contractor

HARTFORD BUILDERS

FINISH COMPANY INC.

Arthur Eaton Hill, Architect

Manchester Construction Co., Contractors

BEAUTIFUL example of ecclesiastical architecture is seen in the South Manchester Methodist Church, an impressive stone edifice of Gothic design which inspires the admiration of all who see it. The photograph at the left illustrates one view of the church's interior, and also serves as a good example of Hartford Builders Finish Company's craftsmanship.

HARTFORD BUILDERS

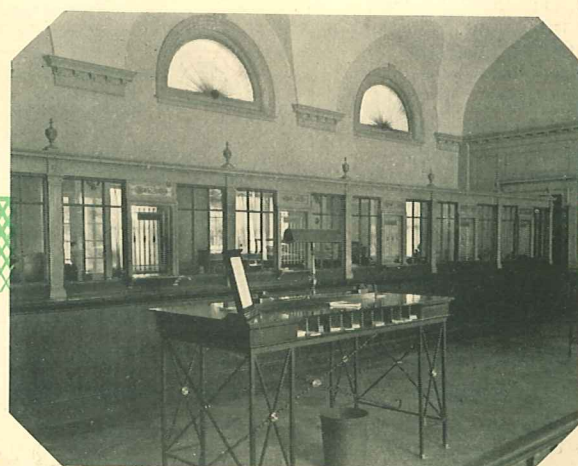

FINISH COMPANY INC.

W. F. Brooks & C. D. Adams, Architects H. Wales Lines Co., Contractors

TYPIFYING the work of the Hartford Builders Finish Company among modern business institutions, we present several views of the Windsor Bank & Trust Company's banking quarters. It will be noticed that fine woodwork is as important in attaining the effect of dignity, tempered by convenience, of the interior of the building as is the proper use of stone and masonry designing the exterior.

HARTFORD BUILDERS

FINISH COMPANY INC.

We have pictured in this section our evidence of achievement, but twelve public buildings, which we have tried to make a cross-section of the work we do. The list presented below enumerates some of the public buildings, schools, and institutions in the construction of which we have played an important part.

SCHOOLS

- State Trade School, Hartford, Conn.
Malmfeldt & Prentice, Architects
Wise & Upson, Inc., General Contractors
- State Trade School, Meriden, Conn.
Lorenzo Hamilton, Architect
Michaels & Schwartz, General Contractors
- State Training School (3 Buildings), Mansfield, Conn.

HARTFORD BUILDERS

FINISH COMPANY INC.

EVIDENCE

OF ACCEPTANCE IN THE PRIVATE
DWELLINGS OF HARTFORD RESIDENTS

HERE again are but a few isolated examples of homes of this community which we had a part in creating. There are many more which limited space forbids including, but we present these as a representative cross-section of our endeavors, evincing the acceptance accorded us by leading Hartford citizens.

HARTFORD BUILDERS

FINISH COMPANY INC.

Ebbets & Frid, Architects
Robert B. Swain, Contractor

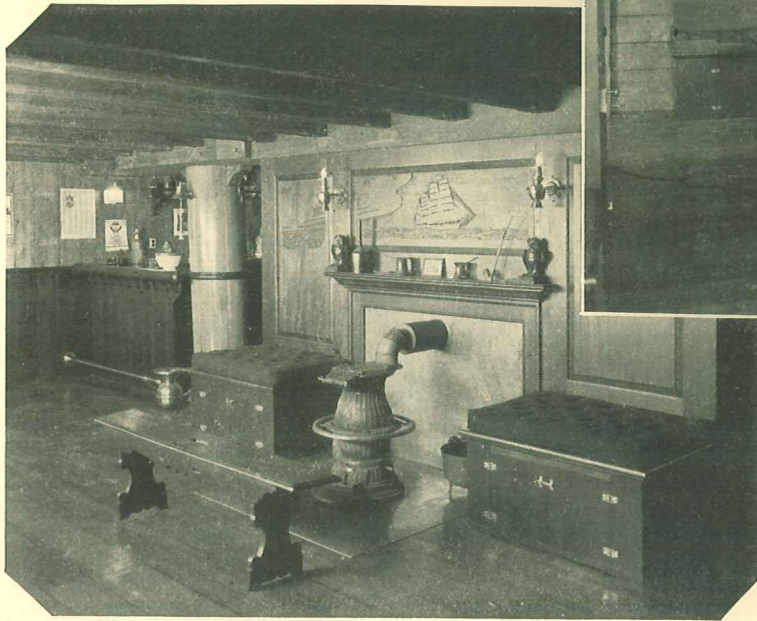

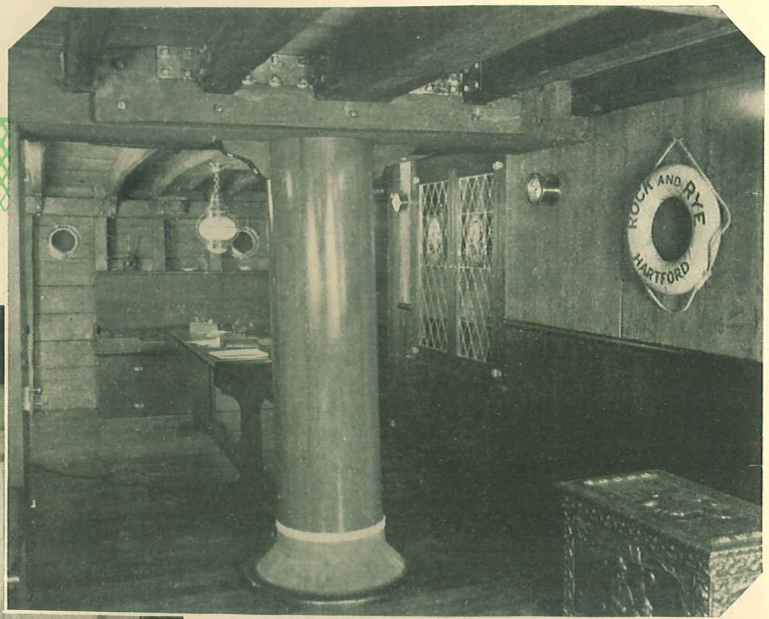

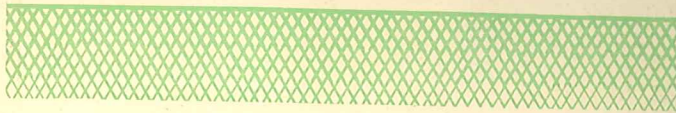

HOME on Whetton Road, Hartford, unsurpassed for beauty of design and execution. Evidence of this organization's acceptance among the homes of this community. An interesting corner of one of the rooms in this fine home is illustrated. Note the beauty achieved by full height paneling.

HARTFORD BUILDERS

FINISH COMPANY INC.

THIS is the home of Charles B. Deeds at Colony Road, West Hartford an interesting feature of which is the unique playroom, dubbed the good ship "Rock and Rye". In this case our facilities for producing anything made of wood lead to the reconstruction of a schooner's cabin. The massive center column is the firmly stepped mast base. The hand-carved detail of the ship above the mantel is a reproduction of the "Great Republic" built by Donald McKay in 1583. Every detail is authentic.

Philip B. White, Contractor
Lester Beach Scheide, Architect

HARTFORD BUILDERS

FINISH COMPANY INC.

At the left is the interesting and unusual home of Roy D. Bassette, Architect, on Albany Avenue, West Hartford, an example of the acceptance of this organization among those who plan and build the finest of homes.

The home at the right is the distinctive and pleasing residence belonging to Dr. John C. Rowley on Asylum Avenue, Hartford, one of an outstanding group, all of which were supplied with woodwork by this firm

Russell F. Barker, Architect

Mr. Lester B. Scheide designed the house at the left for his brother, Mr. Philip W. Scheide. It is located on Colony Road, West Hartford.

The home of Mr. Frank I. Prentice, Woodside Circle, West Hartford, is an interesting blend of the old and the ultra-modern. Its interior is famous for its unique charm and atmosphere of welcome. These characteristics are carried out inside the house, largely by the distinction of its woodwork, all of which was created by the Hartford Builders Finish Company.

T. Merrill Prentice, Architect

WE are particularly proud to have played an important part in the making of the home of Mrs. Grace S. Lincoln of Fernwood Road, West Hartford. In every detail, this beautiful house strikes a refreshingly new note.

The interior view shows the luxurious effects which can be achieved with master craftsmanship in woodworking. Inside and out, this home has attracted the enthusiastic comment of both laymen and architectural critics.

Lester Beach Scheide, Architect

R. F. Jones & Co., Contractors

HARTFORD BUILDERS

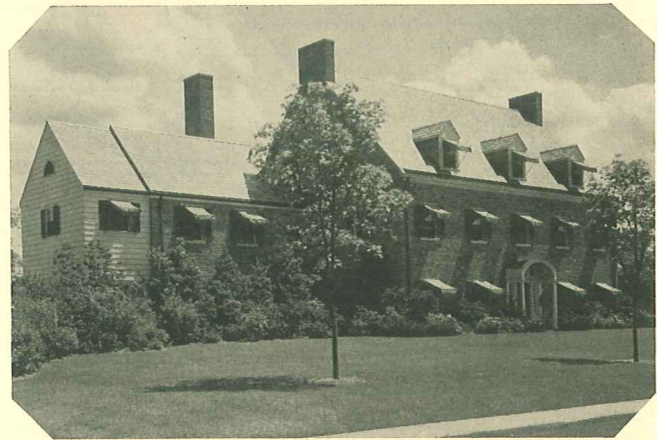

FINISH COMPANY INC.

Russell F. Barker, Architect
R. G. Bent & Co., Contractors

Smith & Bassette, Architects E. W. Canning & Co., Contractors

Ebbets & Frid, Architects Robert B. Swain, Contractor

HE handsome home shown at the top of the page depends largely upon the intelligent employment of woodwork which combines with the beauty of brick to give a particularly pleasing exterior effect. Within, finely executed paneling plays an even more important part in making the home of Mr. James B. Slimmon on Collins Street, Hartford.

The character of the dwelling of Mr. James L. Thompson (lower left) is seen by the first glance at its entrance. It is evidence of the fact that the most distinguished homes depend upon this organization for distinctive woodwork. The home is on Prospect Avenue, West Hartford.

Lower Right: The choice of the Hartford Builders Finish Company to do all the millwork in the home of Benedict M. Holden on Girard Avenue, Hartford, is a natural one, since this company boasts the finest, most carefully detailed construction.

R. Barfort King and Mylchreest & Reynolds, Architects

Dennis Ahern, Contractor

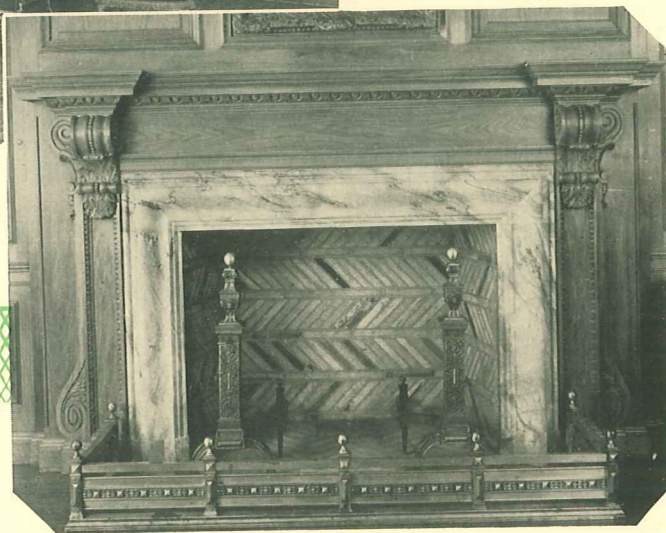

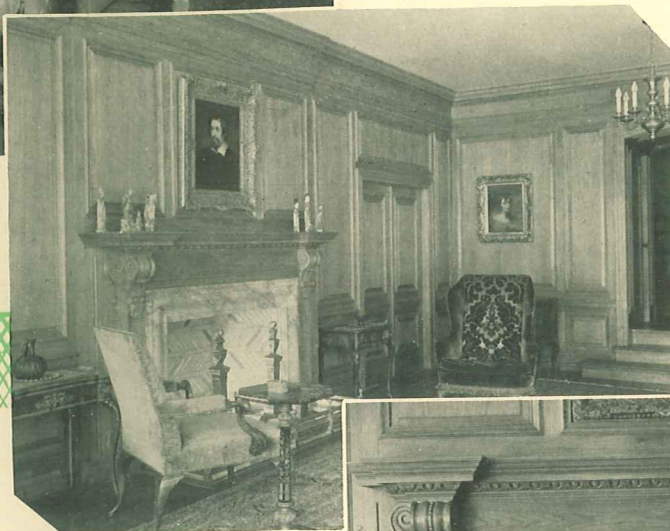

HIS spacious home typifies one of the most beautiful adaptations of the colonial design of which the hospitable circular entrance is a dominating feature. It is the home of Mr. Thomas J. Spellacy, Westerly Terrace, Hartford. The Hartford Builders Finish Company supplied all the woodwork for both exterior and interior.

HARTFORD BUILDERS

FINISH COMPANY INC.

Ebbets & Frid, Architects
Tychsen Bros., Contractors

DOMINATING in location, and magnificent in design and execution, the residence of Mr. Morris Joseloff at Sycamore Road, West Hartford, presents an unsurpassed example of the importance of truly fine woodwork in creating a delightful atmosphere of comfort and charm. Two interesting corners and a hand carved mantel design are illustrated.

HARTFORD BUILDERS

FINISH COMPANY INC.

WHEN Mr. Milton Hayman, architect, designed a home for himself on Albany Avenue, Hartford, he quite naturally chose this office to supply the woodwork that carries out the rustic English theme in a particularly pleasing fashion. The front hallway, a portion of which is shown, is entirely wood paneled and serves to illustrate how much dependence is placed by architects on handsome woodwork in carrying out interior schemes of design.

HARTFORD BUILDERS

FINISH COMPANY INC.

In the foregoing pages we have been limited to the choice of a very few homes in Greater Hartford which have, of necessity, been chosen almost at random. The following list represents work of which we are justly proud, and which we list in recognition of the home owners, architects, and builders who have co-operated with us in making these homes outstanding.

RESIDENCES

Robert Darling, Simsbury, Conn.
